

99% Testos Enanthate Raw Powder Test En Purity with Wholesale Price

Our Product Introduction

for more products please visit us on bodybuild-supplement.com

Basic Information

- Place of Origin: China
- Minimum Order Quantity: 10Grams
- Price: USD
- Packaging Details: 1kg/Foil Bag
- Delivery Time: 3-7days after received payment
- Payment Terms: T/T, Western Union, PayPal
- Supply Ability: 5000KG Per Year

Product Specification

- Product Name: Test Enanthate
- Cas: 315-37-7
- Appearance: White Powder
- Purity: 99%
- Use For: Bodybuilding
- Highlight: **99% Testos Enanthate Raw Powder , 315-37-7 Raw Powder**

Product Description

Product Description

CAS: 315 3
Molecular formula: C₂₆H₄₀O₃
Molecular weight: 400.59
Assay: 98.81% by HPLC
Product Categories: Test Powder Purity Enanthate
Melting Point: 33-35°C.
Appearance: white crystalline powder.

Product Introduction

Test Powder Purity Enanthate is one of the best performance enhancing drugs (PEDs) to promote MG, fat loss, stamina, ability to handle intense workouts, and recovery after injuries. Test Powder Purity Enanthate is admired by professional sportsmen, especially strength athletes and professional weightlifters and bodybuilders, as it helps in improving the levels of muscle definition, protein synthesis, and nitrogen retention besides being free from side effects, unless abused or of a low grade. The roid is also used as part of Test Powder Purity Enanthate replacement therapy to treat hypogonadal males (males with low Test Powder Purity Enanthate) or stimulate puberty in carefully selected males with clearly delayed puberty. It may also be used secondarily in women with advancing inoperable metastatic (skeletal) mammary cancer and who are 1 to 5 years postmenopausal.

Test Powder Purity Enanthate has an active life of nearly 14-15 days and could be detected within a period of two to three months. This Test Powder Purity Enanthate derivative has an anabolic/androgenic ratio of 100:100, which indicates that it is as anabolic as androgenic.

The anabolic roid is commonly used for a cycle of 6-8 weeks and the recommended dose is 300-2000 mg per week for men. The Test Powder Purity Enanthate derivative is not recommended for girls and women, unless its usage is approved by a medical practitioner.

Product Usage

Test Powder Purity Enanthate is one of the many esterified variants of Test Powder Purity Enanthate available. It is an injectable compound with a slow rate of release due to the larger Enanthate ester attached to the Test Powder Purity Enanthate molecule. This augments the release rate and half-life of Test Powder Purity Enanthate to that of a slower release

Test Powder Purity Enanthate is considered the most natural and safest anabolic roid any individual can use, and it is easily the most versatile and flexible anabolic roid in terms of how it can be utilized in cycles and for different purposes and goals.

COA

Items of analysis	Specification	Results
Free heptanoic acid	≤1.6%	conform
Melting Point	34~39°C	37°C
Specific Rotation	+77°~ +82°	+78.5°
Water	≤0.5%	0.30%
Assay	97~103%	99.5%
Related substances	≤2%	Pass
Residual solvents(GC)	Aceton ≤100ppm	Pass
	Methano ≤100ppm	Pass
	Pyridin ≤100ppm	Pass
Conclusion	Be Conform With EP5	

Our service:

1. We have experience in exporting Pharmaceutical intermediates .
 2. Professional packing with professional materials
 3. We have products in stock, and we will deliver them soon when your PO arrived. Meanwhile we will give you the tracking number in order to make you know the exact location of the products. We will keep track of the product until they arrive you; We choose the best courier service for you, and with the delivery around 5-7 working days.
- If any new enquiry, please feel free to contact us!

Our Advantages:

1. High quality under strict QC/QA system with GMP factory price
2. Fast and safe delivery with secure and discreet shipment
3. Providing complete services with our resource integration, we can thus create more competitive advantages for you!
