

Pure Coluracetam Mkc-231 Nootropic Powder Supplements Smart Drugs For Brain Improve

Our Product Introduction

Basic Information

- Place of Origin: China
- Minimum Order Quantity: 10Grams
- Price: USD
- Packaging Details: 1kg/Foil Bag
- Delivery Time: 3-7days after received payment
- Payment Terms: T/T, Western Union, PayPal
- Supply Ability: 5000KG Per Year

Product Specification

- Product Name: Mkc-231
- Cas: 135463-81-9
- Appearance: White Powder
- Purity: 98%
- Usage: Nootropic
- Highlight: Coluracetam Nootropic Powder Supplements,
Mkc-231 Nootropic Powder Supplements,
Pure Coluracetam Powder

Product Description

Smart Drugs for Brain Improve Pure Coluracetam 99% Mkc-231 Nootropic Powder

Basic Info.

Model NO.	Coluracetam	Product Name:Coluracetam Synonyms:MKC-231 BCI-540
Colour	White	CAS:135463-81-9 MF:C19H23N3O3
Assay	99.99%	MW:341.4
Transportation	DHL, UPS, TNT, EMS, FedEx or Other	Product Categories: Amines;Heterocycles;Intermediates & Fine Use:Chemicals;Pharmaceuticals;NUPERCAINAL;Other APIs Appearance: White or almost white powder Assay: 99%
MOQ	1 G	
Exp.	2 Years	Coluracetam (MKC-231) is a synthetic Racetam drug purported to be a Nootropic compound. It does not have a large body of evidence investigating it, but the mechanisms of action (as well as structure) appear to be very distinct from other racetam compounds like Piracetam or Aniracetam.
Transport Package	Disguised	Coluracetam appears to interact with a process known as high affinity choline uptake (HACU for short), which is the rate-limiting step of drawing choline into a neuron for synthesis into the neurotransmitter acetylcholine. Increasing the HACU rate appears to increase the activity of cholinergic neurons, so it is a desired target for cognitive enhancement.
Specification	powder	
Trademark	raw powder	
Origin	China	
Production Capacity	1000kg/Month	

Interventions in rats (as there is no human evidence currently) support the usage of coluracetam at very low oral doses to preserve HACU that is otherwise impaired by the use of research drugs that are known to impair HACU. The limited evidence looking at the inherent effects of coluracetam on the HACU of normal neurons has failed to find any significant interaction.

Coluracetam has also been noted to associate with choline transporters physically, but it is not known exactly what it does once associated.

Coluracetam also seems to have a bit of a stimulant effect. It should help to shake off any of the morning dreariness if taken upon waking and it may produce a nice, comfortable energy boost that can last well into the day. A number of users have reported that this is able to help them improve their motivation and ability to get things done. Another interesting effect is the apparent enhancement of sounds and colors. This can be compared to turning up the brightness on a TV or computer screen, with sounds become fuller and richer.

Function

1. Enhance mental intelligence
2. Boost memory and leaning capabilities
3. Improve brain power to solve problems and protect it from any chemical or physical injury
4. Enhance motivation level
5. Enhance the control of cortical/subcortical brain mechanism
6. Improve sensory perception

Appliction

Coluracetam is helpful in reducing the effects of learning deficits. Not only did it reduce these effects, but it also did not have any of the normally expected side effects. This product is also considered to have great potential as a casual mood enhancer and a powerful memory booster. There is even evidence to suggest that the positive effects on the brain are semi-permanent.

Users also report a rather wide range of Coluracetam benefits. This includes enhanced concentration and speed of cognition. Coluracetam also helps with both short and medium term memory. There are also a number of reports of being able to study and focus more easily while taking this nootropic.

FAQ

Q1: Can i get some samples?

A: Yes, we can supply the free sample, but the shipping cost be paid by our customers.

Q2: How to start orders or make payments?

A: Proforma invoice will be sent first after confirmation of order, enclosed our bank information. Payment by T/T, Western Union Etc.

Q3: How to confirm the Product Quality before placing orders?

A: You can get free samples for some products, you only need to pay the shipping cost or arrange a courier to us and take the samples. You can send us your product specifications and requests, we will manufacture the

products according to your requests.

Q4:What's your MOQ?

A:Our MOQ is 100g. But usually we accept less quantity such as 100g on the condition that sample charge is 100% paid.

Q5: How about delivery leadtime?

A:Delivery lead time: About 3-5 days after payment confirmed. (Chinese holiday not included)

Q6:Is there a discount?

A:Different quantity has different discount.

Q7: How do you treat quality complaint?

A:First of all, our quality control will reduce the quality problem to near zero. If there is a real quality problem caused by us, we will send you free goods for replacement or refund your loss.

Our Advantages:

- 1.We are very experienced with this field(more than 10 years);
- 2.Good after-sales service
- 3.100% quality guaranteed;
- 4.We accept sample order for testing;
- 5.Strong supply ability
- 6.Made in China gold members with high credit guarantee.

Advantages:

1. Leading factory price
2. Huge range of product in stock
3. Research & Development

Our R&D team is continuously developing new product to meet the market.

4. Quality control

At HOTA Co., Ltd, this process is probably the most stringent of all. To us, quality is a commitment. It is a constant process and a continuous improvement.

5. OEM Service: Capsules or Tablets

Safe, Secure Packaging - Full sealed

1-25kgs: Aluminium bag outside and double plastic bags inside

More than 25kgs: Fiber drum outside and plastic bags inside

Fast, Secure Shipping

By Express	By air	By sea
Suitable for under 25kg Fast: 3-7 days	Suitable for more than 25kg Fast: 3-7 days	Suitable for more than 500kg Slow: 7-15 days
