

White API Raw Powder Nootropic Powder Supplements Fladrafinil Cas 90212-80-9

Our Product Introduction

for more products please visit us on bodybuild-supplement.com

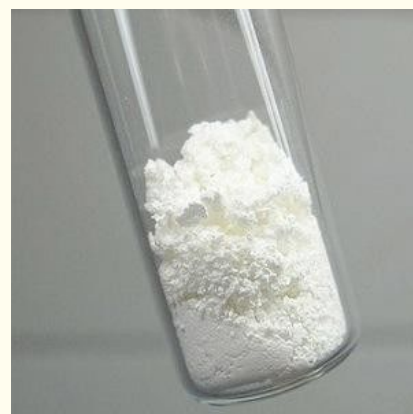

Basic Information

- Place of Origin: China
- Minimum Order Quantity: 10Grams
- Price: USD
- Packaging Details: 1kg/Foil Bag
- Delivery Time: 3-7days after received payment
- Payment Terms: T/T, Western Union, PayPal
- Supply Ability: 5000KG Per Year

Product Specification

- Product Name: Fladrafinil
- Appearance: White Powder
- Cas: 90212-80-9
- Assay: 98%
- Usage: Nootropics
- Highlight: **White Nootropic Powder Supplements, Fladrafinil Nootropic Powder Supplements, 90212-80-9**

Product Description

White Powder API Raw Powder Cas 90212-80-9 For Nootropics Fladrafinil

Product Name: Fladrafinil
 Alias: Fluorafinil, CRL-40,941
 CAS NO.: 90212-80-9
 Molecular Formula: C₁₅H₁₃F₂NO₃S
 Molecular Weight: 325.33
 Purity: 99%
 Appearance: White Powder
 Grade: Pharmaceutical Grade

Description

Fladrafinil (CAS90212-80-9) (also known as fluorafinil and CRL-40,941) is a drug which promotes wakefulness. This nootropic is similar to adrafinil and moda-finil. Nootropics are often called "smart drugs" and are commonly referred to as brain, intelligence, memory and cognitive enhancers. Fladrafinil (CAS90212-80-9) is a stronger alternative to adrafinil and moda-finil. Fladrafinil is a drug that is found in the category of eugeroic classification of drugs which is used as wakefulness drug. Its chemical composition and effects are very similar to those substances found in adrafinil only that it is capable of producing anti-aggressive effects while adrafinil doesn't have this ability.

Benefits

Like adrafinil, the purpose of fladrafinil (CAS90212-80-9) is to promote wakefulness. The smart drug is said to improve concentration and reduce fatigue, enabling its user to become more proactive. The appeal of fladrafinil (CAS90212-80-9) is that it is stronger than the other drugs which are said to give the same benefits. There is proof that the nootropic is twice as strong as adrafinil, making it ideal if that nootropic has started to become ineffective. While being developed, it was also shown that fladrafinil (CAS90212-80-9) can be used to lower aggression, and its calming effects may have a positive impact on those who suffer with hyperactivity.

Fladrafinil (CAS90212-80-9) causes the following in human body;

- 1) Improves memory as it works on dopamine and histamine that are neurotransmitter in the brain
- 2) Increases cognitive function since it boosts the working capacity of the brain when one is in an awkward situation.
- 3) It's used to treat insomnia and depression.
- 4) It promotes consciousness
- 5) It increases motivation, making one to do a lot of activities without exhaustion.

Application:

Increases coordination
 Improves mood
 Helps fight fatigue
 Prevents oxidation within the brain
 Treats alcohol related brain damage

Product name	(Fladrafinil)CRL-40,941		
CAS	90212-80-9	Outer Packaging	1KG
Standard adopted	in-house specification.		
Items of analysis	Specification	Results	
Appearance	Off-white, crystalline powder with slight pink color	Conforms	
Solubility	Soluble in methanol, slightly soluble in ethylacetate and dichloromethane, almost insoluble in water	Conforms	
IR	The infrared absorption spectrum is concordant with the spectrum obtained	Conforms	
HPLC	The retention time of main peak of the test and standard are concordant	Conforms	
Loss on drying	≤0.5%	0.45%	

Largest single impurity	≤0.5%	0.40%
Total impurity	≤1.0%	0.75%
Heavy metals	≤20ppm	Conforms
Sulphated ash	≤0.1%	0.07%
Assay(On dried basis)	98.0%-102%	99.2%
Conclusion	Qualified
