

# CAS 657-24-9 API Active Ingredient Metformin Raw Powder For Control Blood Sugar

## **Basic Information**

Place of Origin: ChinaMinimum Order Quantity: 100GramsPrice: USD

• Packaging Details: 1kg/Foil Bag

Delivery Time: 3-7days after received payment
 Payment Terms: T/T, Western Union, PayPal

Supply Ability: 5000KG Per Year

# **Product Specification**

Product Name: Metformin Cas: 657-24-9 Appearance: White Powder

• Purity: 99%

• Usage: Control Blood Sugar

• Highlight: API Active Ingredient Metformin, CAS 657-24-9

### **Product Description**

#### CAS 657-24-9 API Active Ingredient Metformin Raw Powder For Control Blood Sugar

#### Wholesales CAS 657-24-9 Metformin

Product Name	Wholesales CAS 657-24-9 Metformin
Appearance	Off-White
Shelf Life	2 Years
Test Method	HPLC/UV
Function	Treatment of type 2 diabetes

#### What's the Function of Metformin?

Metformin is the first-line and full-course drug for the treatment of type 2 diabetes, mainly by increasing the sensitivity of muscle, fat and other peripheral tissues to insulin, increasing the uptake and utilization of glucose, promoting the anaerobic glycolysis of sugar, and inhibiting hepatic gluconeogenesis., reduce hepatic glucose output, inhibit the uptake of glucose by intestinal parietal cells and reduce fasting and postprandial hyperglycemia.

#### What's the Application of Metformin?

Metformin also has weight loss effects, and can inhibit cholesterol biosynthesis and storage, reduce triglyceride and total cholesterol levels, improve vascular endothelial cell function, and increase blood flow, especially for obese or overweight patients with type 2 diabetes, Prevent the occurrence and development of macrovascular complications of diabetes and reduce the incidence of cardiovascular events.

#### Advantage:

One of the main advantages of Metformin is that it is effective in controlling blood sugar levels without causing significant weight gain, which is a common side effect of many other diabetes medications. Additionally, it has been

shown to reduce the risk of cardiovascular disease and improve overall health outcomes for people with type 2 diabetes.
Application Scenario:
Metformin is typically prescribed for people with type 2 diabetes, although it may also be used to treat other conditions such as polycystic ovary syndrome (PCOS). It is typically taken orally, either once or twice daily, and may be taken with or without food.
After-sales service:
If you have any questions or concerns about taking Metformin, it is important to speak with your healthcare provider.  They can provide you with personalized advice and guidance based on your individual health needs.
FAQ:
Q: What are the side effects of Metformin?
A: The most common side effects of Metformin include nausea, diarrhea, and stomach upset. In rare cases, it may also cause lactic acidosis, a serious condition that can be life-threatening.
Q: Can I take Metformin if I have kidney problems?
A: Metformin is generally safe for people with mild to moderate kidney problems, but it may not be suitable for people with severe kidney problems or kidney failure.
Q: How long does it take for Metformin to start working?
A: Metformin typically starts working within a few days to a week of starting treatment, although it may take several weeks to see the full effects on blood sugar control.
