

Purity 99% CAS 93479-97-1 Glimepiride Raw Material Powder For Diabetes Treatment

Our Product Introduction

Basic Information

- Place of Origin: China
- Minimum Order Quantity: 100Grams
- Price: USD
- Packaging Details: 1kg/Foil Bag
- Delivery Time: 3-7days after received payment
- Payment Terms: T/T, Western Union, PayPal
- Supply Ability: 5000KG Per Year

Product Specification

- Product Name: Glimepiride
- Cas: 93479-97-1
- Appearance: White Powder
- Purity: 99%
- Usage: Diabetes Treatment
- Highlight: **CAS 93479-97-1, Glimepiride Raw Material Powder**

Product Description

Purity 99% Raw Material Powder CAS 93479-97-1 Glimepiride For Diabetes Treatment

Product Description

Product Name: Glimepiride

CAS: 93479-97-1

MF: $C_{24}H_{34}N_4O_5S$

Molecular Weight: 490.616

Appearance: White powder

Glimepiride is used with a proper diet and exercise program to control high blood sugar in people with type 2 diabetes. It may also be used with other diabetes medications. Controlling high blood sugar helps prevent kidney damage, blindness, nerve problems, loss of limbs, and x-function problems. Proper control of diabetes may also lessen your risk of a heart attack or stroke. Glimepiride belongs to the class of drugs known as sulfonylureas. It lowers blood sugar by causing the release of your body's natural insulin.

Function and Application

Glimepiride (Glimer) is indicated to treat type 2 diabetes mellitus; its mode of action is to increase insulin production by the pancreas. It is not used for type 1 diabetes because in type 1 diabetes the pancreas is not able to produce insulin. Its use is contraindicated in patients with hypersensitivity to glimepiride or other sulfonylureas, and during pregnancy.
