

Cosmetic Peptide Raw Powder Palmitoyl Pentapeptide CAS 214047-00-4 For Anti Aging

Our Product Introduction

Basic Information

- Place of Origin: China
- Minimum Order Quantity: 10Grams
- Price: USD
- Packaging Details: 1kg/Foil Bag
- Delivery Time: 3-7days after received payment
- Payment Terms: T/T, Western Union, PayPal
- Supply Ability: 5000KG Per Year

Product Specification

- Product Name: Palmitoyl Pentapeptide
- Cas: 214047-00-4
- Purity: 99%
- Appearance: White Powder
- Use For: Anti-Aging
- Highlight: **Cosmetic Peptide Raw Powder , 214047-00-4, Palmitoyl Pentapeptide**

Product Description

Anti-Aging Use Cosmetic Grade Peptide Raw Powder Palmitoyl Pentapeptide CAS 214047-00-4

Basic Information:

Product Name	Anti-Aging Cosmetic Grade Peptide Palmitoyl Pentapeptide CAS 214047-00-4
CAS	214047-00-4
Purity	99%min
MF	C39H75N7O10
Storage	-20°C
Deliver Time	Within 24 Hours After Receiving The Payment
MOQ	1KG

Brief Introduction:

Palmitoyl Pentapeptide is a compound that is derived from a five-part chain of amino acids known as pro-collagen I pentapeptide. By itself, this amino chain has been shown to increase the production of collagen in laboratory cultures. Palmitoyl pentapeptide is a synthetic derivative of this five-part amino acid chain, and it is normally marketed under the brand name Matrixyl, which is simply a combination of palmitic acids and amino-acid chains.

Functionally, Palmitoyl Pentapeptide promotes the production of two compounds: collagen and hyaluronic acid. Combined, these compounds help the skin recover and heal from wounds and penetrative damage by generating new specialized skin cells that bind the damaged tissue together.

Function of Palmitoyl Pentapeptide-7

Palmitoyl Pentapeptide-7 mimics the activity of DHEA, the youth hormone that functions to reverse IL-6 over-production, and therefore reduce the aging symptoms as well as the phenomenon of immunosenescence.

Palmitoyl Pentapeptide-7 can enhance the functions in a variety of skin care and color cosmetic formulation.

Application of Palmitoyl Pentapeptide-7

Palmitoyl Pentapeptide-7 is an anti-aging skin care product that claims to reduce lines and wrinkles. It's meant to be another option for those who want younger-looking skin, but do not want to go through Botox injections, face-lifts, or other more invasive procedures. In addition, Acetyl hexapeptide-3 is much less expensive than those more widely used techniques.

Palmitoyl Pentapeptide-7 is a unique new peptide that both reduces the degree of existing facial wrinkles and has been demonstrated effective against their development. It's been shown to inhibit the formation of the SNARE complex (a core of membrane proteins that mediates neuronal exocytosis) as well as catecholamine release.

These inhibitions confer anti-aging activity of Palmitoyl Pentapeptide-7; they closely relate to the basic biochemical mechanisms of wrinkle formation. Controlled studies have also demonstrated that facial wrinkle depth can be reduced, especially in the forehead and around the eyes, and that Palmitoyl Pentapeptide-7 can prevent apparent facial skin ageing.

With 3-5 work days after your payment

FAQ of Anti-Aging Cosmetic Grade Peptide Palmitoyl Pentapeptide CAS 214047-00-4

Q1: Do you Accept Sample Order?

A: Yes. The smallest order we accept is 1 BOX.

Q2: Do you accept VISA business credit card?

A: Yes. VISA business credit card is in our payment .

Q3: Is there any discount?

A: Yes, if you want to purchase larger quantity, we can offer a better price for you.

Q4: How long does it take to me if I order?

A: About 3-5 days upon receipt of payment.

Q5: What kind of transportation do you have?

A: We have many ways of transportations, eg: Air, Sea, Special Lines, TNT, FEDEX, EMS, ect.
