

99% Testos Cypionate Raw Powder Test Cyp Purity With Wholesale Price

Our Product Introduction

for more products please visit us on bodybuild-supplement.com

Basic Information

- Place of Origin: China
- Minimum Order Quantity: 100Grams
- Price: USD
- Packaging Details: 1kg/Foil Bag
- Delivery Time: 3-7days after received payment
- Payment Terms: T/T, Western Union, PayPal
- Supply Ability: 5000KG Per Year

Product Specification

- Product Name: Testos Cypionate
- Appearance: White Powder
- Assay: 98%
- Cas Number: 58-20-8
- Usage: Muscle Building
- Highlight: **Raw Powder Testos Cypionate, 99% Testos Cypionate, Wholesale Price Testos Cypionate**

Product Description

99% Testos Cypionate Raw Powder Test Cyp Purity with Wholesale Price

Product Description:

Appearance: White crystalline powder

Purity: 98%min

CAS: 58-20-8

Molecular formula: C₂₇H₄₀O₃

Molecular weight: 412.61

Minimum order:10g

Introduction:

Test Powder Purity Enanthate is one of the best performance enhancing drugs (PEDs) to promote MG, fat loss, stamina, ability to handle intense workouts, and recovery after injuries. Test Powder Purity Enanthate is admired by professional sportsmen, especially strength athletes and professional weightlifters and bodybuilders, as it helps in improving the levels of muscle definition, protein synthesis, and nitrogen retention besides being free from side effects, unless abused or of a low grade. The roid is also used as part of Test Powder Purity Enanthate replacement therapy to treat hypogonadal males (males with low Test Powder Purity Enanthate) or stimulate puberty in carefully selected males with clearly delayed puberty. It may also be used secondarily in women with advancing inoperable metastatic (skeletal) mammary cancer and who are 1 to 5 years postmenopausal.

Test Powder Purity Enanthate has an active life of nearly 14-15 days and could be detected within a period of two to three months. This Test Powder Purity Enanthate derivative has an anabolic/androgenic ratio of 100:100, which indicates that it is as anabolic as androgenic.

The anabolic roid is commonly used for a cycle of 6-8 weeks and the recommended dose is 300-2000 mg per week for men. The Test Powder Purity Enanthate derivative is not recommended for girls and women, unless its usage is approved by a medical practitioner.

Usage:

Test Powder Purity Enanthate is one of the many esterified variants of Test Powder Purity Enanthate available. It is an injectable compound with a slow rate of release due to the larger Enanthate ester attached to the Test Powder Purity Enanthate molecule. This augments the release rate and half-life of Test Powder Purity Enanthate to that of a slower release

Test Powder Purity Enanthate is considered the most natural and safest anabolic roid any individual can use, and it is easily the most versatile and flexible anabolic roid in terms of how it can be utilized in cycles and for different purposes and goals.

COA:

Items of analysis	Specification	Results
-------------------	---------------	---------

Free heptanoi acid	≤1.6%	conform
Melting Point	34~39°C	37°C
Specific Rotation	+77°~ +82°	+78.5°
Water	≤0.5%	0.30%
Assay	97~103%	99.5%
Related substances	≤2%	Pass
Residual solvents(GC)	Aceton ≤100ppm	Pass
	Methano ≤100ppm	Pass
	Pyridin ≤100ppm	Pass
Conclusion	Be Conform With EP5
